- 6.Axiom - Last Singapore Sling
- 7.Dark Machines - Rituals
- 8.Kaleb And Contour - Euff
- 9.Dark Machines - Elektro 168!
- 10.Calibre - Trip it

Bio :

Born in Macedonia in the late 70's, Nikolce Vasilevski, alias **Dark Machines**, started to make and play music at the age of 11, with a computer and a Yamaha synth.

After having realized his first complete track influenced by U96, The Prodigy, 2Unlimited etc, he started to make Trance, Goa and Ambient, Break Beat and finally walked on the path of D'n'B in 1995. At that time, he was mostly influenced by Astral Projection, Etnica, Renegade Soundwave, Chrystal Method, BT.... The first big project he worked on was with TOCIJAN, with whom he produced an album of « breakbeat electro tranced style ». As D'n'B is giving him the widest experimenting field than any other style, he was determined to make a D'n'B album based on guitars and a mix of D'n'B, blues, jazz...with RUBIN, the great guitarist of the band "T&R".

Besides, Dark Machines had the opportunity to exchange experiences with American dj's and producers during his stay in Miami in 2005. As soon as he returned from the US, he worked on four psy trance tracks with dj Miss Triptamina and also with Macedonian artists such as Aphrodisia, Proteus, and baseK. He joined Elektrotribe in 2006 and soon released his album Gears. His new single "**Rituals**" came out the 19th November 2007 and received many great critics from everywhere.
