Bio

Datensi is a 21 years old Greek minimal and techno producer who first started experimenting with his productions about a decade ago. He made his debut on December of 2007 He signed Epic Man EP on Elektrotribe Records from Berlin. A tech - minimal album with four tracks, including a Moog Conspiracy remix. After four months of silence he released another EP called Doris & Lavon. A more tech-house style EP signed on TtekK records, a sub label of Downtown Monkeys Records from Columbia.

Now Datensi turned up things to a more techno style following the steps of his foretypes, Stephan Bodzin, Oliver Huntemann and John Dahlback. He has produced 10 tracks for the next releases which listeners will have the opportunity to listen them on the myspace player. Finally Datensi started experimenting the Live and the first samples of the sets will be available soon.
