Bio ::

Dominic was born and raised round the northern regions of Germany. Inherently enamored by the rattles of music he got seduced to create music on his own at the age of 16. By dint of two turntables he began to scratch and to ably recombine funk and hip hop. It didn't take him long to get his first experiences in front of an audience: at first there were private events where he could give a proof of his skills. Imbued by the nightlife of large cities like Hamburg or Berlin Dominic's style evolved more and more to a completely individual sound which covers many facets of house and techno. Being 19,

Dominic and friends started to organize events on their own account in Kiel. Later Dominic began to play in clubs all around the North of Germany, but the future is yet to come and so he has already loads of bookings far beyond the North. He settled in Berlin years ago, where he successfully finished his studies and became an electronic music producer. He is esteemed for his minimalistic style and his detail-loving manner & in his berliner home base, he is now considered as one of the Nightlife established DJ.

2008, Dominic enjoyed a residency on Ibiza, where he played regularly for the "I Party" & other events. Back from the Island, and full of inspiration, he's now hard working on his new Productions... it's the beginning of a long story... to be continued...!

PAST GIGS :::
