Head of the label Elektrotribe and successful electronic music producer, Moog Conspiracy has a tough discography including more than 40 tracks and a studio album. In only 3 years he has become one of the most demanded Act in Europe, acclaimed for the amazing intensity & diversity of his dj and live performances.

In 2010, the launch of Elektrotribe INTENSE Tour gives him the opportunity to play around the globe (USA / India), playing either live or dj & special back to back sets with Elektrotribe artists like Breger, Animaltek or Jalebee Cartel.

Moog Conspiracy studio work is also in big progress : the second album is expected before the end of the year, and his newest productions are receiving the support of Richie Hawtin, Laurent Garnier, Luciano, Ricardo Villalobos, Loco Dice, Audiofly, Oxia, Tocadisco, Eric Morillo, Someone Else, Max Cooper...

Bio :

Moog Conspiracy began his experimentations with music a long time ago. Since ten years with his metal roots, he walks on the path of constant improvement. Rock, trip-hop, minimal, funk, house, trance; his eager ears find sounds everywhere in order to create tomorrow's ones.

So, how to qualify his music?... Always deep and dark, he removes the hearts and souls with his minimalist electro. A strong techno beat, precise and acute; serpentine synthesizer melodies; a hate of obvious structures; destabilising noises: all an atmosphere that he creates, to make the listener rise from ecstatic heights to the black depths of human spirit.

His first EP began the legend. Is it deep? seduced a huge amount of techno freaks and DJs, like Lucio and Pep and Digital Filth who remixed his tracks, or Cosmopolitan who wanted him to remix for them. Now he's on the edge of another acid revolution with his new album "Elements of Density".

More than a DJ, he's a real creator, a true artist with a vision and a goal: transform music and let hearts shake.

Live performance :

Since the release of his album, **Romain** has been teaming up with **David (Pixel Noizz)** to create an amazing live act! 6 months has been required to prepare this unique show.

The **AV Live** act involves real time audio and visual production and mixing, performed live by Romain and David. The performance length is usually 1h30, with a variable tracklist to adapt to the mood of the audience. Since May 2009, the live is performed with multiples screen projections: i.e. panoramic or 360°.

What you feel by seeing Moog & Pixel Noizz live performance, is that the visuals and the music are in symbiosis, the visual themes reflect the sonorities of the music, and moves you in a new dimension. Never repeating, the performance transforms you from one state to another, amplifying the "I was there" feeling.

Their involvement within the Berlin underground Scene is now giving them new energy to perform for an always growing audience.
