

Welcome in the world of Elektrotribe records.

The label Elektrotribe records was created by Romain Favre & Jeremy Govciyan back in 2006. It was named "ElektroTribe" since the original concept was to use the web to create a community of people, producing new and unheard electronic music and remixing the tracks for each others. The aim was to enable meetings between producers and visual artists, to give birth to new exciting live projects.

The Elektro-Tribe has then moved from Paris to find its new home in the German capital Berlin. The first release came out in September 2006, after what the releases have been flowing over, to reach more than 30 official releases, including 5 artists' albums and 3 compilations.

What is Elektrotribe?

Elektrotribe productions present an impressive audio range in the electronic style; a lot of the Artists evolve between deep minimal and techno, housy and groovy styles. Others are experimenting crossovers between electro ,dub, house, jazz etc... They are kind of Laboratory Scientists experimenting over and over. The internationality of the structure and its artists gives an incredible multicultural richness to the label. From Detroit to Sydney through Berlin, Paris and London, the large scale of talents from all over the world takes you into a travel within electronic music & visuals performances. Well Elektrotribe is a sort of a huge melting pot of awesome producers and live acts. As it was set on the original concept, the Tribe works on both hands with music and image, each release of the label is worked out with a proper design by our official designers beautyparlour.

Who Are Elektrotribe?

Basically Elektrotribe is like a big family, each member of the managing crew has his own role and sphere of action : Romain takes care of the A&R and management, Jeremy of the webdesign and video production, Elsa, Jeff and Tug of the live part, events organization, booking etc.. and Stefan (beautyparlour) of the design of the releases. Elektrotribe has signed artists like Moog Conspiracy, Slepak, Breger, Alex Tomb, Datensi, The Free Electric Band, Dark Machines, Lucio & Pep, Harnessnoise, Digital Filth... each of them on the edge of their style. This diversity of influences, styles and the sound of the label, give birth to this magic, collecting worldwide great recognition on the electronic music stage.

Elektrotribe on the Decks

Elektrotribe works actively with clubs and "uncommon" places to bring you some awesome music and visuals with the best possible atmosphere and location. Our label djs : Dominic Tausendfreund, André Uih and Tiari , are masters in the art of setting the people in the mood to party. Our Vjs : Neon Golden, Monkexpresso and Hi TekTrash are supporting those positive pulsations, while translating the music and party atmosphere into incredible visuals, brining the party experience one step further. Most of Elektrotribe events are now taking place in Europe (Germany, France, Belgium, Italy, Uk...) and the dance floors goes on fire each time one of us is behind the decks.

**Elektrotribe is on the edge of another electronic music revolution.
Share the experience !**
